

Statement of Memory Volatility

Product and Manufacturer				
Models: I400 AC Current Clamp	Manufacturer: Fluke Corporation			
	Address: 6920 Seaway Blvd.			
	City: Everett	State: WA	Zip: 98203	Phone: 800-283-5853
Volatile Memory				
Does the item contain volatile memory (i.e., memory whose contents are lost when power is removed)?				
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (If the answer is 'Yes', provide the following information for each type of memory.)				
Memory Type (SRAM, DRAM, etc.):	Size:	User Modifiable:	Function:	Process to Clear:
		<input type="checkbox"/> Yes <input type="checkbox"/> No		
Non-Volatile Memory				
Does the item contain non-volatile memory (i.e., memory whose contents are retained when power is removed)?				
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No (If the answer is 'Yes', provide the following information for each type of memory.)				
Memory Type (BBRAM, Flash, EEPROM, etc.):	Size:	User Modifiable:	Function:	Process to Clear:
		<input type="checkbox"/> Yes <input type="checkbox"/> No		

Media

Does the item contain media storage capability (i.e., removable or non-removable disk drives, memory cards, etc.)?

Yes No (If the answer is 'Yes', provide the following information for each type of memory.)

	Storage Type (Disk, Tape, etc.):	Size:	User Modifiable:	Function:	Process to Clear:
			<input type="checkbox"/> Yes <input type="checkbox"/> No		

Additional Information

<Example: This is a simple cable tester. FLASH memory is used for program storage and is modified in one instance to store a simple 16-bit number which is used as a calibration factor (called the Nominal Velocity of Propagation). This factor is used to correct the length measurement of a cable. RAM memory is used as operating memory and stack while the unit is running.>
