Description

Standard Gain Horn Antenna LB-90-25-C2-TFSP0, operating from 8.2 to 12.4GHz with a nominal 25dB gain and low VSWR 1.25:1 with TNC Female connector output. The model LB-90-25-C2-TFSP0 has uniform gain through its frequency span, providing efficient performance characteristics and directionality. It can handle 150W continuously and 3000W peak power. Constructed of lightweight corrosion-resistant aluminum, the horn comes with a specially designed weatherproof radome which provides excellent protection against the rain and dust but has very little loss across the full operating frequency band. This standard gain horn antenna is linearly polarized and ideally suited for EMI testing, direction finding, surveillance, antenna gain and pattern measurements and other applications.
