The latest generation of compact mass spectrometers.  
Modular design. Powerful software. Low detection limit.

# PRISMAPRO®

The latest generation of compact mass spectrometers.

The combination of high sensitivity, maximum stability and intelligent operation make the PrismaPro the perfect solution for mass spectrometry.

## Versatility

Its modular design offers you a variety of application options in industrial and analytical environments, in research & development, in semiconductor production and in coating technology.

The PrismaPro is the ideal solution for applications ranging from quality assurance, leak detection and residual gas analysis right through to complex, quantitative tasks.

## New generation of software

The newly developed PV MassSpec software is a further plus. In addition to being especially easy to operate, it also serves as an easy-to-read platform for transferring all measured data.

## Open programming interface

Alternatively to the PV MassSpec, the disclosed JSON programming interface of the PrismaPro can also be accessed directly. Together with a wide selection of interfaces, such as digital and analog inputs and outputs or Ethernet, integration into your system is easily achieved.

Our product and service professionals around the world stand ready to provide you with application assistance on the implementation of the PrismaPro. Many decades of customer and application-specific experiences make Pfeiffer Vacuum your ideal partner.

#### Customer values

- Optimum adaptability due to modular design
- High performance in spite of compact size
- A variety of interfaces make for simple systems integration
- Networkable through Ethernet
- High measurement speed, stability and high resolution
- Flexible operation thanks to interchangeable analyzers and electronics
- Two filaments mean maximum up-time
- Lowest detectable partial pressure  $3 \cdot 10^{-15}$  hPa (mbar)
- Easy total pressure measurement due to directly connectable gauges
- Saving of time through intuitive operation of the PV MassSpec software
- World-class support and worldwide on-site service
- Easy integration thanks to disclosed JSON programming interface

## PV MassSpec – new Software for PrismaPro®

The PV MassSpec software has been specifically developed for the PrismaPro and offers an easy-to-read, user-friendly platform for capturing and visualizing measured data and parameter records. Complete measurement procedures can be programmed.

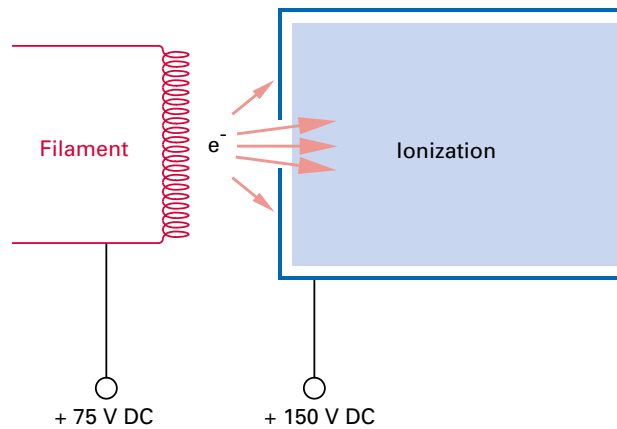

PV MassSpec measurement routine

- User-friendly, intuitive operation
- Automated measurement routines via included sequencer
- Leak detection and vacuum diagnosis with just one click
- Automatic calibration and tuning
- Simple definition of measurement recipes
- Mass spectrometer data can be linked with external signals
- Compatible with PrismaPlus

## Overview of technologies

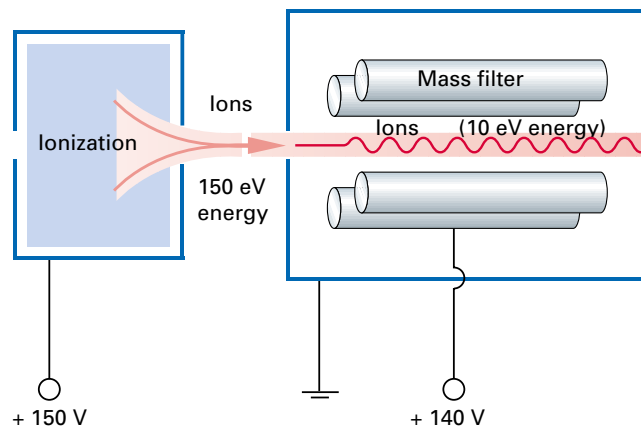

### Biased ionization chamber

Biasing the ionization chamber results in an extremely low background signal. The electron-emitting filament is positively biased relative to ground. This design prevents desorption of gas particles from the chamber walls, and thus the generation of an undesired background signals by electron stimulated desorption.

### Field-axis technology

One of the most important factors in the performance of a mass spectrometer is the transmission of the ions from the ion source into the mass filter. With the aid of field-axis technology, the ions are able to cross the peripheral fields of the separating system without any noteworthy interaction. This enables a high level of sensitivity (A/hPa) to be achieved without the need for pre and post filters.

## Connection options

### Standard

#### Standard I/O connection (D-Sub 15-pin connector):

- 1 Analog input
- 2 Digital inputs
- 1 Relay

#### Ethernet

#### Power supply:

External power supply SP 250  
90–260 V AC; 50/60 Hz

### Extended

#### Extended I/O connection (D-Sub 62-pin connector):

- 8 Analog outputs
- 8 Analog inputs
- 10 Digital outputs
- 5 Digital inputs

#### Connections

**total pressure transmitter**

## **VACUUM SOLUTIONS FROM A SINGLE SOURCE**

Pfeiffer Vacuum stands for innovative and custom vacuum solutions worldwide, technological perfection, competent advice and reliable service.

## **COMPLETE RANGE OF PRODUCTS**

From a single component to complex systems:

We are the only supplier of vacuum technology that provides a complete product portfolio.

## **COMPETENCE IN THEORY AND PRACTICE**

Benefit from our know-how and our portfolio of training opportunities!

We support you with your plant layout and provide first-class on-site service worldwide.
